

SHINGLES

can make every day a struggle.

Local doctors are studying an investigational medication for **shingles**

If you're at least **30 years old and have recently developed a shingles rash**, you may qualify for a local research study of an investigational medication.

To qualify for this 120-day study, you must meet these requirements:

- Are at least 30 years of age
- Are able to receive your first dose of study medication within 120 hours (5 days) of a possible shingles rash appearing
- Have not received the shingles vaccine

If you volunteer and qualify, you'll receive at no cost:

- Study medication
- Study-related care from a local doctor

Health insurance and referrals aren't required to participate. Doctors will check other requirements to confirm that you qualify.
