

**Herpes Zoster / Shingles Clinical Research Opportunity**  
***Providence Health Partners – Center for Clinical Research***

is looking for patients with acute Herpes Zoster (Shingles) to participate in a clinical trial of a new antiviral medication.

Patients **must**:

- Be 50 years of age or older
- Have a clinical diagnosis of herpes zoster (shingles) as evidence by a rash
- Have pain associated with shingles
- Have not yet received antiviral treatment
- Be enrolled into the study and receive their first dose **72 hours** or less from appearance of rash

---

If qualified and enrolled into the study, patients will receive:

- Antiviral treatment for 7 days (Valtrex or one of two dose regimens of FV-100)
- Follow-up for shingles pain for 90 days
- A small stipend for attending study visits

**If you have a patient who is interested in participating please contact:**
