

Have you considered participating in a clinical study?

JESSE CRUMPLER
USA
Jesse has type 2 diabetes

Are you living with **type 2 diabetes**?
And do you want to help the development
of a future treatment?

You may participate in the NN9541-4945 study if you fulfil the following

- Have type 2 diabetes, and a BMI \geq 23
- On metformin with or without SGLT2 inhibitor
- HbA1c of 7.5 - 10.0%
- Are 18-75 years, male or female
- Be able and willing to adhere to study procedure

What do you need to do?

- Inject the study medicine with an easy-to-use injection pen once a week
- Attend regular study-related health checks and medical tests including having blood samples taken
- Maintain a dosing diary and complete questionnaires
- Keep in contact with the study staff during the study at regularly scheduled visits for a duration of one year

This study is currently looking for participants – for more information please contact:
